

SNAKETRAP

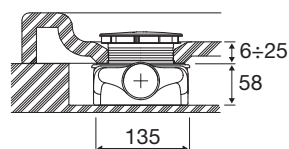

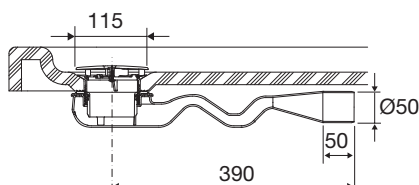

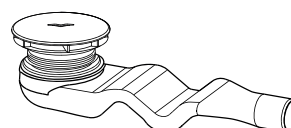

SNAKETRAP is characterised by three main features: the special double water seal, the high flow rate and a very reduced height.

The DOUBLE HYDRAULIC SEAL guarantees an excellent barrier against the return of foul odours.

SNAKETRAP allows has a flow 15% greater than other traps on the market.

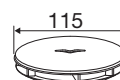

Furthermore, the brand-new SNAKETRAP, thanks to its height of just 58 mm, allows showers to be installed in renovations where floor height is limited.

- Snaketrap reduced height trap for shower tray Ø 90 hole
- Horizontal gully in PP with 50 mm diameter outlet
